

reneW

Learning expedition
renewable energy

Energy production has impacts on economic activities, on the environment, and on our quality of life. It is therefore not surprising that over the past few years, these questions have taken on a growing importance in society. Although Quebec is privileged to be able to count on hydroelectricity, other forms of renewable energy are emerging: biomass, wind and solar energy.

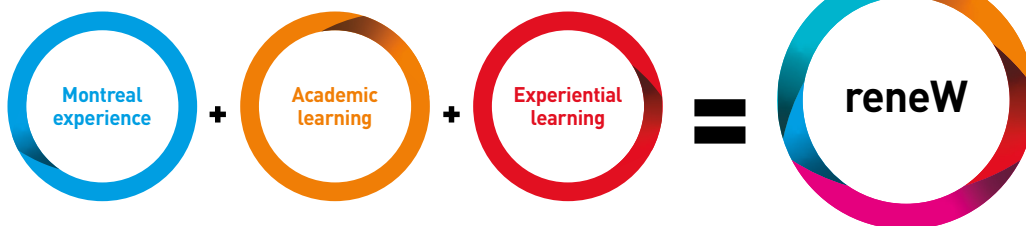

WHAT IS reneW?

It's a one-week program which exposes participants to the realities of this industry, in a Canadian as well as a global context.

Carried out on HEC Montréal's Campus, it is offered in English or French to managers and executives.

ABOUT THE ONE-WEEK PROGRAM

- Seminars discussing: Energy Markets and Trading, Project Financing, Renewable Energy Markets and Regulation and Social Acceptability
- Corporate visits in Montreal and meetings and discussions with company management
- Certificate of completion
- Keynote speaker

MONTREAL HIGHLIGHTS

Montreal is the headquarters of several large renewable energy companies, including Hydro-Québec.

Quebec linked its cap-and-trade system for greenhouse gas emission allowances to California's, thereby creating the largest carbon market in North America.

Montreal is a leader in sustainable mobility and intelligent transportation.

Quebec is a province where 99% of its electricity is from renewable sources.

PARTICIPATION FEES AND REMARKS

1-week program

Number of participants: 15-25 maximum

Accommodation, meals, airfare and local transportation are not included in the program fees.
