

Master of Science (MSc) program

Learning Objectives and Competencies

Learning objective 1

Acquire thorough knowledge in a field of specialization in management

- Objective 1.1 Integrate concepts, models, theories, and methods in the area of specialization.
- Objective 1.2 Apply knowledge to solve a problem in the area of specialization.

Learning objective 2

Systematically conduct rigorous scientific research

- Objective 2.1 Use appropriate references to conceptualize a problem.
- Objective 2.2 Use a rigorous approach to apply the method(s) chosen to solve a problem.
- Objective 2.3 Analyze the results issuing from the application of the method(s) used and draw conclusions from the research.
- Objective 2.4 Justify one's choices at all steps of the research process.

Learning objective 3

Adopt ethical and professional behavior when conducting research and doing business

- Objective 3.1 Comply with rules and good practices in research ethics.
- Objective 3.2 Abide by the principles of scientific integrity.
- Objective 3.3 Exercise good judgment regarding ethical, social, and environmental issues.

Learning Objectives and Competencies

Learning objective 4

Demonstrate critical thinking

- Objective 4.1 Identify the strengths and weaknesses, value, precision and authenticity of a fact or an assertion.
- Objective 4.2 Question one's choices and identify ways to improve the problem-solving process.
- Objective 4.3 Question one's basic assumptions and those put forth in the field.

Learning objective 5

Work independently to produce an essay

- Objective 5.1 Plan and follow a timetable.
- Objective 5.2 Demonstrate initiative in solving problems related to the essay.

Learning objective 6

Communicate effectively

- Objective 6.1 Master the language associated with the field of specialization.
- Objective 6.2 Write a high quality essay.
